

## TECHNICAL DATA SHEET

# NowoClean Metal Cleaner

**Product description**

NowoClean Metal Cleaner is a cleaning agent for metal roof surfaces. It contains ammonia and must be diluted with water. It effectively removes dirt, grease, biofilm, oil, etc. In addition, it is very effective on zinc roofs, where improved adhesion can be achieved by treatment with NowoClean Metal Cleaner.

**Application**

Used immediately prior to high pressure cleaning of the metal roof. Read the label and safety data sheet before handling the product. Use gloves when handling the product. Do not mix with other chemicals. The product contains ammonium compounds and an emulsifying surfactant mixture. Dilute with water at a ratio of 1 part cleaning agent and 4 parts water (1:4).

Apply the NowoClean Metal Cleaner mixture to the entire roof and then, after minimum 15 minutes, use high-pressure water equipment to clean the roof (minimum 500 BAR – hot water system).

During the high-pressure cleaning procedure, it is important to remove rust, loose paint and dirt on the metal surface. A steel brush can be used if necessary. After cleaning, always fully rinse the roof surfaces to make sure no loose particles are left on the roof.

**Highlights and features**

- Effectively removes dirt, grease, biofilm and oil
- Effective for zinc roofs – improves adhesion

**Technical data**

<b>Colour:</b>	Colourless
<b>pH:</b>	11
<b>Density:</b>	1.0±0.2 g/ml
<b>Packaging:</b>	5 litres
<b>Storage:</b>	1°C – 30°C

**Remarks**

Wait minimum 15 minutes from applying NowoClean Metal Cleaner, before initiating the high pressure cleaning process.
