

## TECHNICAL DATA SHEET

# NowoClean Mineral Cleaner

**Product description**

NowoClean Mineral Cleaner is a liquid cleaning concentrate that is diluted with water before use. NowoClean Mineral Cleaner has excellent cleaning efficiency against dirt and greasy deposits on mineral surfaces such as facades, roofs and tiles. It works effectively and cleanses chemically.

**Application**

Universal application for manual and mechanical cleaning. Used for cleaning mineral surfaces such as concrete blocks, tiles, plinths, driveways and terraces, as well as public squares, streets, sidewalks, industrial floors, facades, tile, concrete and fibre cement roofs. The surface must be completely dry before treatment. Where unpaved soil is adjacent to the treated surface, an impermeable ground cover must be used to prevent contamination

**Highlights and features**

- Effectively removes dirt on mineral surfaces
- For both manual and mechanical cleaning

**Remarks**

Always make a test area to ensure product and surface compatibility.  
Should not be used on solar cells without prior testing. Do not use for fish ponds or the like.

**Mixing Ratio:**

In cases of severe soiling, NowoClean can be used undiluted, let it work on the surface for a few minutes before manually starting with a stiff broom, water hose or high pressure cleaner.

For regular maintenance and cleaning, the product is diluted with water 1:50.

Range 100–250 ml/m<sup>2</sup> in a diluted version 1:50

## TECHNICAL DATA SHEET

### Technical data

<b>Working temperature:</b>	From 5-35 gr. (Max 85% RH)
<b>Packaging:</b>	25 ltr./200 ltr./1000 ltr.
<b>Cleaning:</b>	Work tools rinse with water
<b>Consistency :</b>	liquid watery universal cleaning agent
<b>Storage:</b>	Keep frost free and out of reach of children. Safety: Wear protective gloves and glasses during application and mixing.
<b>Environment:</b>	Do not enter drains, fish ponds, rainwater streams or other types of aquatic environment. Waste must be collected and handed over at the municipal recycling station.
<b>Odour:</b>	Mild soapy odour
<b>PH:</b>	Approx. 8 pH diluted: 8.
<b>Dilution:</b>	From concentrate to ready-to-use liquid, dilute 1: 50 parts with water.
<b>Colour:</b>	Colourless
